Shu Zong Chen - shu.chen@freelancedreams.com
Full-stack developer living in ~~Hawai'i~~ Las Vegas
https://bitbucket.org/sirpengi - https://github.com/sirpengi

I am a generalist capable of quickly getting up to speed in any domain. Lately I've been doing frontend work for security companies, building realtime applications, and working on interesting side projects in a full-stack capacity. I've been fully remote for over half a decade and have experience working with a physically separated team.

## Professional Experience

*Senior Developer, TerbiumLabs LLC @ terbiumlabs.com (2015-Present)*
Updated prototype dashboard with a modern, functional frontend stack (react/omniscient), designed billing system (stripe, recurly), building internal security tools (Flask/Django) with quick turnaround.

*Lead Web Developer, SpiderOak @ spideroak.com (2013–2015)*
Updated legacy codebase with modern stack (Django/Backbone), systems orchestration (ansible/lxc/docker), introduced automated testing, code coverage, code review.

*Developer, CreativeMarket Inc. @ creativemarket.com (2012–2013)*
Full stack developer for creative assets marketplace. Put into production php (website), python (recommendation engine), javascript (frontend), c (truetype rendering library).

*Developer/Designer, RealGeeks LLC @ realgeeks.com (2010–2012)*
Full stack developer on high traffic real estate SaaS platform.

*Founder/Consultant, FreelanceDreams LLC @ freelancedreams.com (2008–Present)*
Freelance design, development and managed hosting for local business and non-profits.

## Civic Engagement

*Developer, Fight for the Future (2017-Present)*
Contractor with renowned net-neutrality activism group to implement new campaign sites related to activism.

*Developer, amistillcovered.com (2017)*
Developed interactive questionnaire and informational site to help people understand the ramifications of the current health care bill being proposed in congress.

*Creator, nevadamarchesforward.com (2017)*
Designed and developed an organizational site for progressives in Nevada, including group directory and consolidated calendar automatically scraped/synced from facebook/meetup/google calendars.

*Developer, SopaBlackout @ sopablackout.org (2012)*
Wrote cross-browser (but library-less) javascript tool used by a million users across the web to protest SOPA/PIPA on Jan 18, 2012.

*Founder, HiCapacity – Honolulu Makerspace @ hicapacity.org (2011–2016)*
Founding team of first self-sustainable O'ahu based makerspace.
